Prayer room & AI halal scanner

Survey Result:

Powerful Network Effects

More Users

Users enrich content and boost engagement.

More Providers

Providers attract users with diverse offerings.

Mutual Reinforcement

Growth on one side fuels the other in a continuous loop.

Four-Layer Architecture

Frontend

Intuitive iOS/Android app with maps and reviews.

Backend

Robust AWS cloud infrastructure for data and listings.

AI

Machine learning-powered ingredient scanner for compliance.

Verification

Halal certification checks and meticulous manual review.

GROWTH STRATEGY

From Niche to Mainstream Adoption

Pre-Launch & Month 1-3

Manual verification of 500 Seoul listings and early user onboarding. Target **500 users**.

1

Month 4-6

Encourage daily usage by integrated **prayer alerts, gamified food scanning, and organic discovery features** and launch **halako.com.kr** for onboarding. Target **2,000 users**.

2

Year-End

Drive viral growth, expand to **Busan & Jeju**, and enhance with **AI tools**. Target **10,000 users**.

3

MONETIZATION MODEL

Sustainable Revenue Streams

Freemium Scheme

Paid to get advanced feature and priority discounts

Marketplace Commissions

Sales commissions: \$20-30K/year.

Provider Fees

Shop fees: \$120K/year.

\$150K

Total Annual Revenue

Year 1 target, up to \$180K

Pre-launch Listings

Referral Bonuses

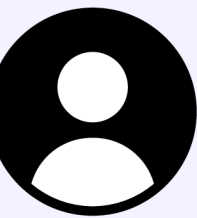

Strategic Partnerships

AI Integration in HALAKO

Data Inputs

- **Product Data** – food and cosmetic ingredient lists → halal/haram, contamination

- **User Data** – personalize recommendations: length of stay, diet, interest, preferences

- **Community Data** – Reviews, posts, corrections made, to keep information relevant

AI Intelligence Layer

- **Dietary Verification AI** - OCR + computer vision read labels

- **Personalization AI** - Matches user profile + behavior

- **Community Learning AI** - Turns user posts and reviews into data

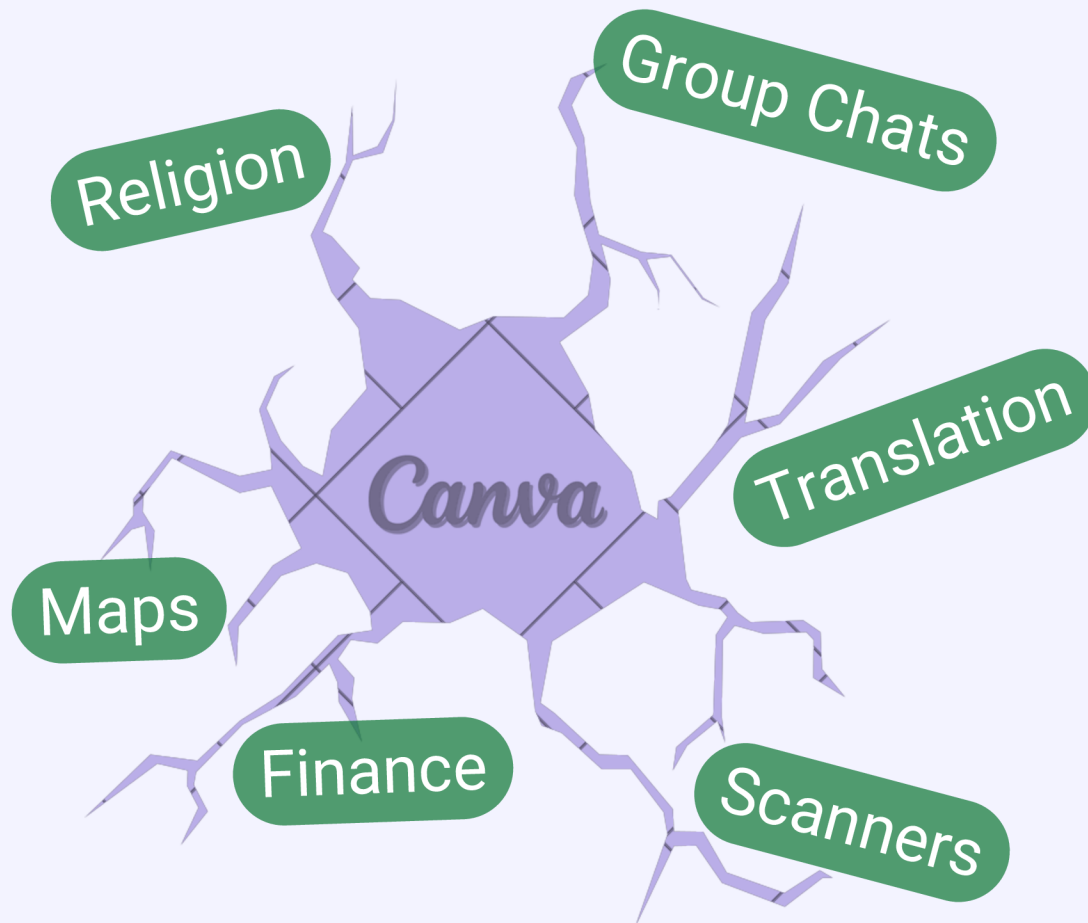

User Data Network
Experience Effect

Official halal certification	Availability of a halal menu	Restaurant run by a Muslim owner	The need for an advance reservation	Alcohol-free	Pork-free

Competitive Landscape & Differentiation

HALAKO AS THE SOLUTION

CURRENT PROBLEMS

HALAKO AS SOLUTION

AI LIFESTYLE PLATFORM

Flexible Rules Engine

halal, vegan & allergy support

Early-Mover in Korea

builds data, partnerships, and trust first

MUSLIM-FOCUSED APP → ETHICAL LIFESTYLE SUPERAPP

Key Challenges & Implication

Scaling Two-Sided Trust

For Users & Merchants

Trust requires reliable data and ongoing merchant updates to keep listings accurate.

Make trust measurable with tiers and update dates.

Multi-Homing Risk

Users switch across maps and chats, so HalaKo risks being occasional.

Drive daily return with itineraries, saved lists, and scan history.

Global Expansion without Brand Dilution

Broader features can grow the market, but may blur the halal identity.

Preserve halal identity while scaling ethical lifestyle features.

Thank you
